Professional Summary

DevOps Engineer with 7 years of hands-on experience automating and securing cloud infrastructure on Azure and AKS. Proficient in Terraform-based Infrastructure as Code, CI/CD pipeline development (Azure DevOps, GitHub Actions, GitLab, ArgoCD), and containerization with Docker, Helm, and Kubernetes. Strong background in DevSecOps tooling (SonarQube, TFSec, TruffleHog), observability (Prometheus, Grafana, Azure Monitor), and scripting automation (Python, PowerShell, Bash) to reduce manual effort and improve deployment consistency. Experienced in troubleshooting complex infrastructure issues, implementing backup/DR strategies, and managing Git-based version control across enterprise environments.

Skills

Microsoft Azure, Terraform, Azure DevOps, Git, GitHub, Github Actions, Version Control Strategies, DevOps CI/CD - Azure Pipelines, JSON and YAML Files, Linux, Scripting - PowerShell, Azure CLI, Bash, Containerization, Docker, Kubernetes, Prometheus, Grafana, Azure Monitor, Azure Kubernetes Service (AKS), Azure Container Registry (ACR), ArgoCD, Helm, TFSec, SonarQube, GitOps, Infrastructure as Code (IaC), DevSecOps

Employment History

Module DevOps Lead – Sopra Steria India

July 2025 – Present

- Lead DevOps engineering for Italy-based enterprise programs (Credem ICP & GenAI, Unieuro) within the DPS Delivery Unit, driving CI/CD, cloud infrastructure, and security initiatives across AKS environments.
- Upgraded AKS clusters to Kubernetes v1.35.3 (N-1 supported), implemented Liveness/Readiness probes to resolve pod health issues, and remediated infrastructure and penetration-test vulnerabilities to strengthen availability and security posture.
- Designed AKS backup and VM patch management strategies for disaster recovery, and are leading Terraform-based Blue-Green deployment architecture for Production AKS to improve release reliability and rollback capability.
- Built and optimized end-to-end CI/CD pipelines using Azure DevOps, GitHub Actions, and GitLab, integrated with ArgoCD for GitOps-based AKS deployments, cutting deployment cycle times.
- Implemented Infrastructure as Code (IaC) using Terraform for consistent, version-controlled provisioning, and designed a Static Egress Gateway for fixed outbound IP connectivity.
- Containerized and deployed workloads via Docker, Helm, and AKS, applying DevSecOps practices with SonarQube for automated code quality and security scanning.
- Established observability using Prometheus and Grafana for proactive monitoring, alerting, and reliability improvements.
- Automated infrastructure and operational workflows using Python, PowerShell, and Bash, reducing manual effort and improving deployment consistency.
- Managed Git/GitHub/GitLab source control and branching strategies, collaborating cross-functionally with dev, QA, and infra teams to standardize DevOps best practices and improve system uptime.

DevOps Engineer – Reliance PPM Services Limited

Nov 2021 – June 2025

- Automate and manage infrastructure on Azure using Terraform, Azure DevOps, and scripting languages (Bash, PowerShell, Azure CLI) to streamline resource provisioning.
- Leveraged Azure DevOps for end-to-end automation of build, test, and deployment pipelines.
- Implemented TFSec and TruffleHog for proactive security scanning of Terraform code repositories.
- Enhanced resource provisioning workflows with Git-based version control.
- Designed and implemented Infrastructure as Code (IaC) solutions using Terraform to automate provisioning and management of cloud resources while ensuring compliance and security across all environments.
- Configured and managed Azure Monitor for production environments, achieving improvement in incident detection and response.
- Implemented end-to-end CI/CD pipelines using Azure DevOps, reducing deployment time and improving release frequency across applications.
- Implemented containerization strategies using Docker and Kubernetes, utilizing YAML & JSON-based configuration files to deploy scalable multi-container applications.
- Restoring of an Azure VM using Snapshot and backup.
- Manage source code repositories using Git within Azure Repos, GitHub, or other version control systems.
- Applied analytical skills to perform deep-dive troubleshooting of complex cloud infrastructure and network configuration issues, resulting reduction in downtime.

DevOps Engineer – Valu Connex

Apr 2021 – Oct 2021

- Managed infrastructure on Azure cloud using Azure portal and ARM templates.
- Monitored and managed client's cloud infrastructure, creating Azure Virtual networks, and subnets.
- Configured VMs using Azure portal.
- Configured Virtual networks connectivity using Vnet peering.
- Implemented Azure site-to-site and point-to-site VPNs.
- Configured Azure Load Balancer for efficient load distribution and traffic management.
- Configured and managed Azure Application Gateway.
- Configured and managed NSG (Network Security Group).

Cloud Engineer – Integrated Wireless Solutions Pvt. Ltd.

Feb 2019 – Jun 2019

- Monitored and managed client's cloud infrastructure efficiently.
- Created various resources including resource groups, V-net, subnet, Virtual Machines, NSG, SQL database, Storage account.
- Added additional NICs to Azure VMs as needed.
- Resized Azure VMs in the Azure Portal as per requirements.
- Utilized Azure pricing calculator for cost estimation.

Network Engineer – Reliance SMSL Limited

Feb 2016 – Jan 2019

- Managed OLT finalization project for Jio services in UP West.
- Placed Fiber Network Equipment as per field requirements.
- Created In-Building designs for large MDUs.
- Provided support for Jio Air-Fiber Plus connection.
- Supported investigation and fault management for ISP access electronics.
- Interacted with NOC for root cause analysis and recommendations.
- Managed configuration, deployment, and administration of networking systems.
- Coordinated installation and integration of network equipment.

IT Engineer – CMC Limited

May 2015 – Feb 2016

- Investigated and resolved technical issues while maintaining the office network infrastructure for the Reliance JIO project.
- Provided comprehensive hardware and software support to users, kept detailed asset records, and managed the infrastructure for a state office and JIO Centres.

Associate - Customer Engineer – HCL Infosystems Limited

Aug 2011 – Mar 2014

- Provided comprehensive customer support for both hardware and software on Windows and Linux platforms, including monitoring customer hardware and configuring hardware within networks.
- Led the Dell project as a DSP support engineer and was recognized as a Dell Certified System Expert.

Education

Karnataka State Open University
B. Tech in Computer Science Engineering

2015

Dayalbagh University, Agra
Diploma in Electrical Engineering

May 2011

Dayalbagh University, Agra
ITI - Wireman Certificate

May 2008

U.P. Board, Agra
Higher Secondary

May 2007
